Dragonfly Decoder!

Every dragonfly found here has been spotted at Chew Valley Lake! How many can you find?

Broad Bodied Chaser

Four-spotted Chaser

Southern Hawker

Emerald Damselfly

? Did you know ?

1. Dragonflies were one of the first insects to appear on planet earth! They were around BEFORE the dinosaurs, 300 million years ago!
2. They can fly at the same speed as a car around town at nearly 30 miles per hour!
